DE KAAP GAME BREEDERS

Rare Game Auction

9 SEPTEMBER 2017, 10:00

Vredenheim Wine Estate | Stellenbosch R 310
www.dekaapwildbedryf.co.za www.dekaapwildbedryf.co.za

Presented by
FEATUREING PROVEN ADAPTED CASTLE DE WILDT SABLE, ROAN & GOLDEN WILDEBEEST GENETICS
The well known Castle de Wildt is a privately owned rare game auction house, owned by the Groenewald family. Apart from the venue, Castle de Wildt is widely renowned and respected for the vast variety of outstanding genetics in over 31 species of wild animals. All animals are in excellent condition and cared for by a large team of experienced people who are animal lovers and conservationists in their own right. Castle de Wildt is committed to caring for all animals young, old or sick as a trademark for the responsibility of our profession. Castle de Wildt firmly believes in the positive effect created by their breeding programs for the conservation of certain key species. All breeding programs in fact have greatly assisted in raising awareness, as there is no doubt that the majority of people who experience scarce game breeding programs or have interaction of some sorts with these magnificent animals, are positively influenced towards conservation issues. All our animal records are carefully recorded and DNA profiled in-house and certified by Unistell.

Our goals and objectives in breeding rare game species are:

- To establish and grow a sustainable market share of privately owned rare game species in order to be recognized as an industry leader and authority in the wildlife breeding industry of Southern Africa.
- To carefully and accurately uphold the scientific recording process of each individual animal in order to record DNA and genetic analysis.
- To uphold and maintain only the highest standards of excellence (breed standards) for all species and colour variants.
- By religiously and faithfully upholding and maintaining the stud book in order to maintain scientific mating plans and eradicate inbreeding in all species.
- To uphold a no tolerance policy against unacceptable practices such as hybridization and cloning.
- To ethically embrace the business principles with regard to genetic defects and genetic manipulation.
- To responsibly select excess animals not fit enough for the stringent requirements of breeding, to be supplied to the ever growing hunting and food security demand.
TERMS AND CONDITIONS

All animals are offered for established or emerging farmers and new entrants who aim to grow and establish their game ranching practices. Some animals are also offered for the hunting and tourism industry, such as lodges, nature reserves and game farms that would like to offer a variety of wildlife to visitors and guests.

INSURANCE
Animals are insured from fall of hammer and for transit and 14 days after delivery. Please read the insurance cover letter elsewhere in this catalogue.

TRANSPORT
Please check every lot carefully for transport conditions, as these may differ from lot to lot.

MEASUREMENT
Where final measurements are not available on the day of auction, it will be supplied when animal is loaded.

DISCLAIMER
De Kaap Game Breeders, its designers and printers take all care to avoid errors. De Kaap Game Breeders accepts no responsibility for errors, spelling mistakes, incomplete or incorrect information supplied by guest sellers, misrepresentation on any project committed to printing or publication. Please contact De Kaap Breeders in order to acquaint yourself with updated information regarding animal specifications, new calves, latest measurements etc.

DEFINITION OF QUAGGA
Any reference to a quagga will be reference to a Burchell zebra, which in the sellers opinion resembles the external characteristics of the “Extinct Quagga”.

We would like to take this opportunity to congratulate the De Kaap Team for putting together a great auction and we wish them great success in this endeavor.

Comprehensive insurance cover is included in the purchase price for all animals sold at the De Kaap auction.

Cover consists of the following:

- all risk on the seller’s farm
- capture
- transportation
- 14 Days Post release stress
- 14 Days all risk on buyer’s farm
- Pre-existing illness

The insurance policy will terminate 45 days after the fall of hammer if the animal(s) haven’t been transported yet.

The transport of animal(s) must be done in accordance to the SANS codes. The transporters of animals must be approved by the insurer. In order to comply with the policy conditions, the buyer is required to notify us 24 hours before capturing of animal(s) to ensure that cover will be in place, failing in this can result in your claim being rejected by the insurance company.

The buyer must ensure that they read the policy wording and the cover note carefully in its entirety to fully understand the cover. If any information is incorrect please contact us immediately.

The excess of 20% on RSA animals and 30% on Namibian animals is for the buyer’s account.

Please contact info@vitaferis.co.za for any additional information.
